

The Pre-Pandemic State of VPNs

Before the implementation of lockdowns and quarantines in early 2020, a large study was conducted to understand the current state of VPNs. 228 IT Professionals across organizations with multiple on-premises and/or cloud environments were surveyed to gain insight into the challenges faced by network security teams when charged with implementing and managing VPNs and what new capabilities network security teams want to see added to VPNs.

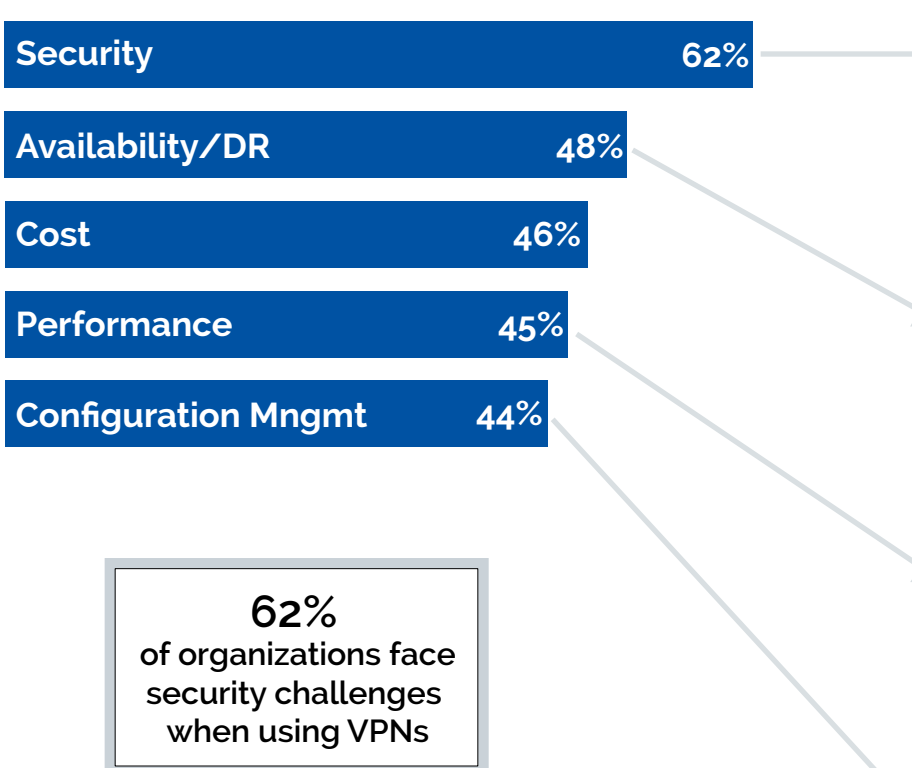

VPN Use Cases

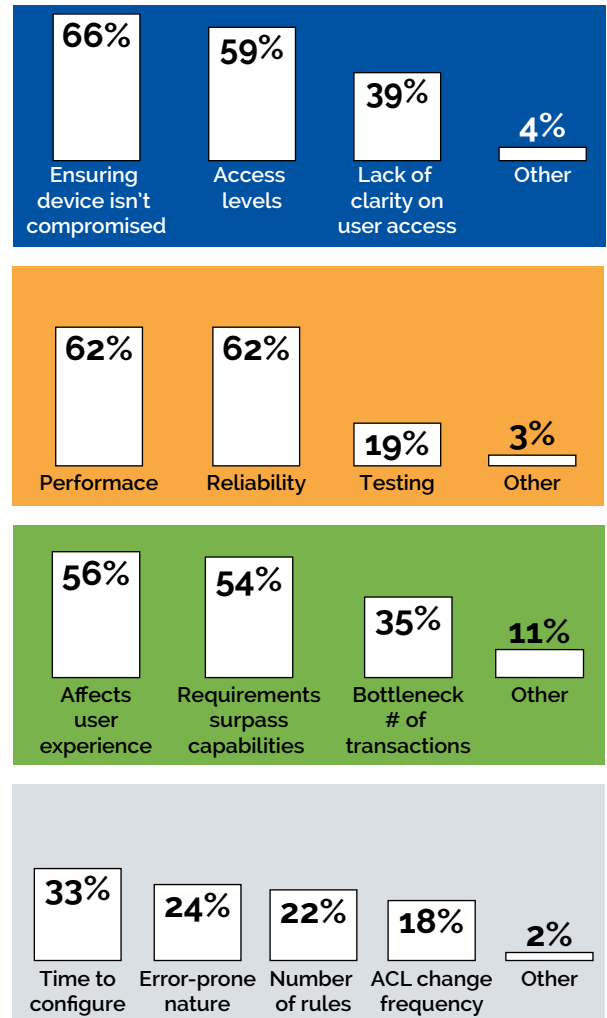

Most Popular VPN Brands

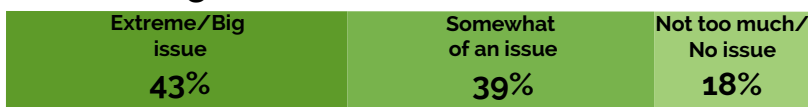

What are the top VPN pain points?

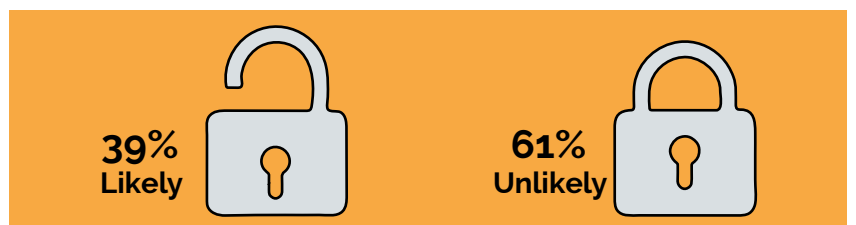

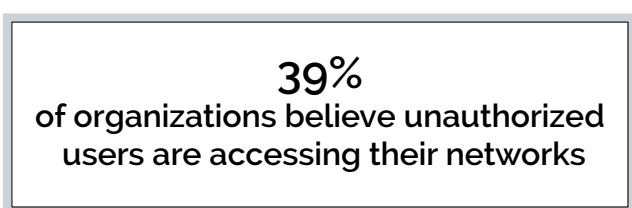

Why?

To what degree are VPN related costs an issue?

Is someone is on your network that shouldn't be?

The Future of VPNs

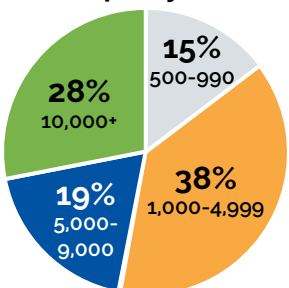

Inclination to Explore VPN Alternatives

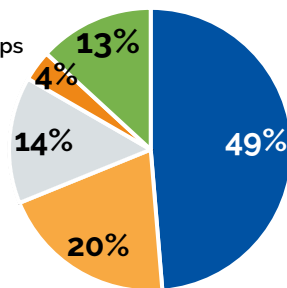

Preference for remote connections without "attackable" network presence

Company Size

Job Function

Survey Methodology
